

Restore Medical Freedom in Massachusetts

Support HD 578 to Restore Medical Freedom in Massachusetts

Members of the Massachusetts General Court are seeking to pass HD 578, a pro-freedom bill that would protect Bay Staters from forced vaccination and discrimination based on one's medical decisions, and ensure informed consent.

[HD 578](#) is sponsored by Representative John Gaskey (R-Carver) If enacted, it would take multiple actions to protect medical freedom, including preventing vaccine mandates, prohibiting discrimination based on one's medical decisions, and protecting informed consent. The bill would also create a cause of action against entities that violate the bill's provisions.

During the [Covid-19 pandemic](#), all levels of government blatantly disregarded the U.S. Constitution and imposed a wide range of unprecedented and totalitarian restrictions. **If freedom-loving Americans are to stop the imposition of a biomedical security state, it is imperative that citizens push back, rein in these government entities, and ensure they cease to violate our constitutional liberties.**

Although the Covid pandemic and its effects are largely over, the threat of medical tyranny remains, and it's essential that our state government enact robust protections of our God-given rights — and HD 578 would be a good starting point.

Urge your state representative and senator to pass HD 578 and to robustly protect all our God-given freedoms.
