

Protect Private Property: Stop Carbon-capture Pipelines

Support HB 1210, HB 1295, and HB 1574 to Stop Carbon-capture Pipelines in North Dakota

Members of the North Dakota Legislative Assembly are seeking to enact legislation protecting individuals' property rights while pushing back against eminent domain and carbon-capture pipelines.

House Bill No. 1210 ([HB 1210](#)), House Bill No. 1295 ([HB 1295](#)), and House Bill No. 1574 ([HB 1574](#)) are sponsored by Representative SuAnn Olson (R-Baldwin) and a coalition of other representatives and senators.

If enacted, these bills would enact a moratorium on direct-air carbon-capture projects, repeal tax breaks that incentivized carbon capture, and create a cause of action for individuals who have been harmed by carbon-capture pipelines. ***These bills would be major steps toward protecting property rights and public safety, and pushing back against heavily subsidized "green" energy.***

Despite currently having the ability to use eminent domain, carbon-capture pipelines are entirely private and will not directly benefit the public. Furthermore, some of the companies that would profit from them are [foreign-based](#) and have [troubled histories](#).

Additionally, the carbon-capture pipelines are [closely connected](#) to the [UN's Agenda 2030](#) "sustainable development" scheme to eliminate private property and totally reshape society in the name of fighting "climate change." The pipelines also are associated with [serious safety concerns](#), and have been shown to be a [poor investment](#).

Contact your state legislators and urge them to strongly stand up for property rights — and against Agenda 2030 — by enacting HB 1210, HB 1295, and HB 1574, and resisting efforts to water down
