

Russia-Ukraine: A War Between Villains? | Freedom Is The Cure

In this episode, renowned veteran investigative journalist William Jasper discusses the possibility that Ukrainian neo-Nazis massacred their own people. He also dispels any notion of Vladimir Putin being a force for good by laying out the history of treachery by the former KGB agent-turned-Russian leader. He talks about how U.S. sanctions on Russia have hurt the U.S. more than Russia, and he explains how media propaganda of the Ukraine-Russia war is intended to draw the world into a larger global conflict in which the only winners will be the globalists.
