

Shrink Federal Government by 80% with Constitutionalism | Freedom is the Cure

If our politicians were to consult the U.S. Constitution before every vote, we estimate that 80% of the federal government would not exist. In this episode, Christian Gomez and Peter Rykowski of the John Birch Society's research department join Paul to discuss unconstitutional federal departments, how American society gradually moved toward a paternalistic government, and how patriots can reverse this trend. This episode's featured action tool includes the Congressional Scorecard and Freedom Index, both created to help voters hold members of Congress accountable to the country's fundamental governing documents.
