

Tyranny's Kryptonite: The U.S. Constitution

America has always been the number one destination for those seeking freedom and prosperity. Although not perfect, no other nation in the world has been as desirable as America. A major reason for that has been its governing documents, particularly the U.S. Constitution. But over time, adherence to the Constitution has waned, and with it the freedom and prosperity that made America so great. In this episode, Paul and Constitutional scholar Robert Brown discuss what a Constitutional response to Covid would've looked like, how much of the federal government is unconstitutional, and how Americans can restore their nation.
